01 Admission - register and reserve

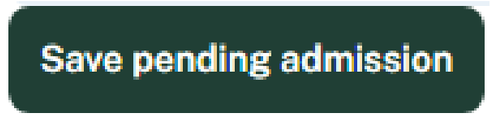

Admission > Admissions > New admission / Patient identity & intake

ADMISSION - full portal page

1. Save pending admission

Search for an existing identity first. For this example enter Demo Sameer Khanna, age 45, Male; Dr Demo Anika Rao; Demo G-104; Insurance; expected stay 2 days. Click **Save pending admission**, then **Open admission record**.

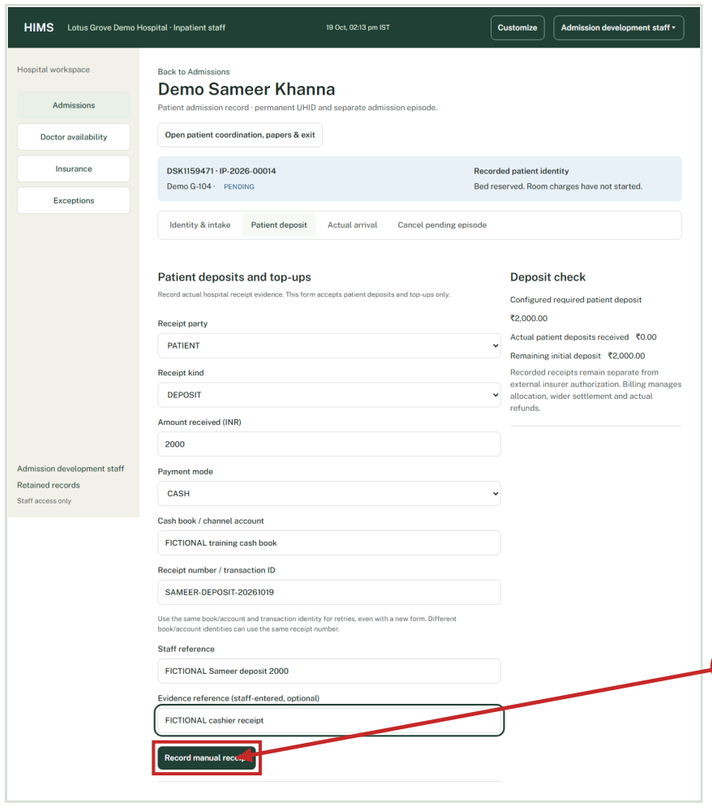

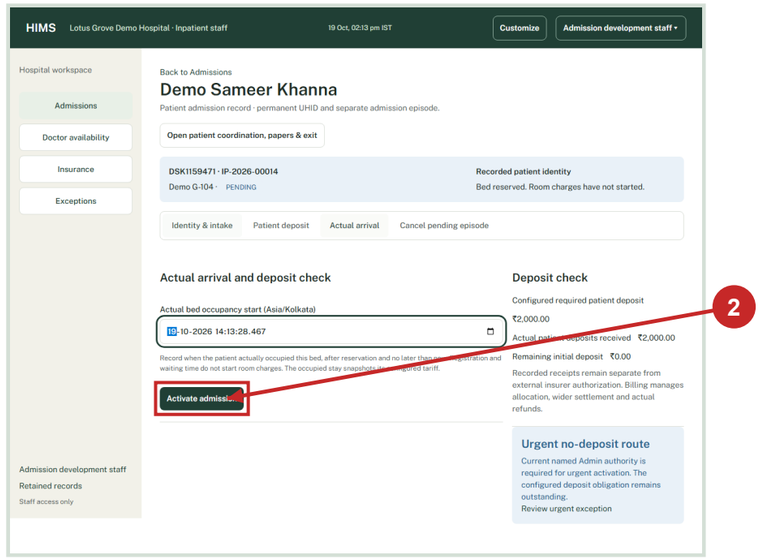

Result: Pending reservation created: IP-2026-00014, UHID DSK1159471. The bed is reserved; room use has not started.

One hospital: Lotus Grove Demo Hospital. This fictional example is already completed. Follow the arrows as a guide; do not repeat its stored receipts. The full portal pages are retained; button details on the right make each click readable.

02 Admission - deposit, then actual arrival

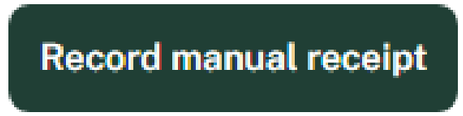

Admission > Sameer > Patient deposit; then Actual arrival

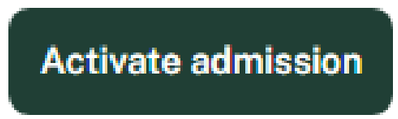

1. Record manual receipt

In **Patient deposit**, enter ₹2,000 received, the hospital channel, unique receipt/transaction reference and evidence. Click **Record manual receipt**.

2. Activate admission

Open **Actual arrival**. Check the deposit requirement, enter the actual bed-occupancy start and click **Activate admission**.

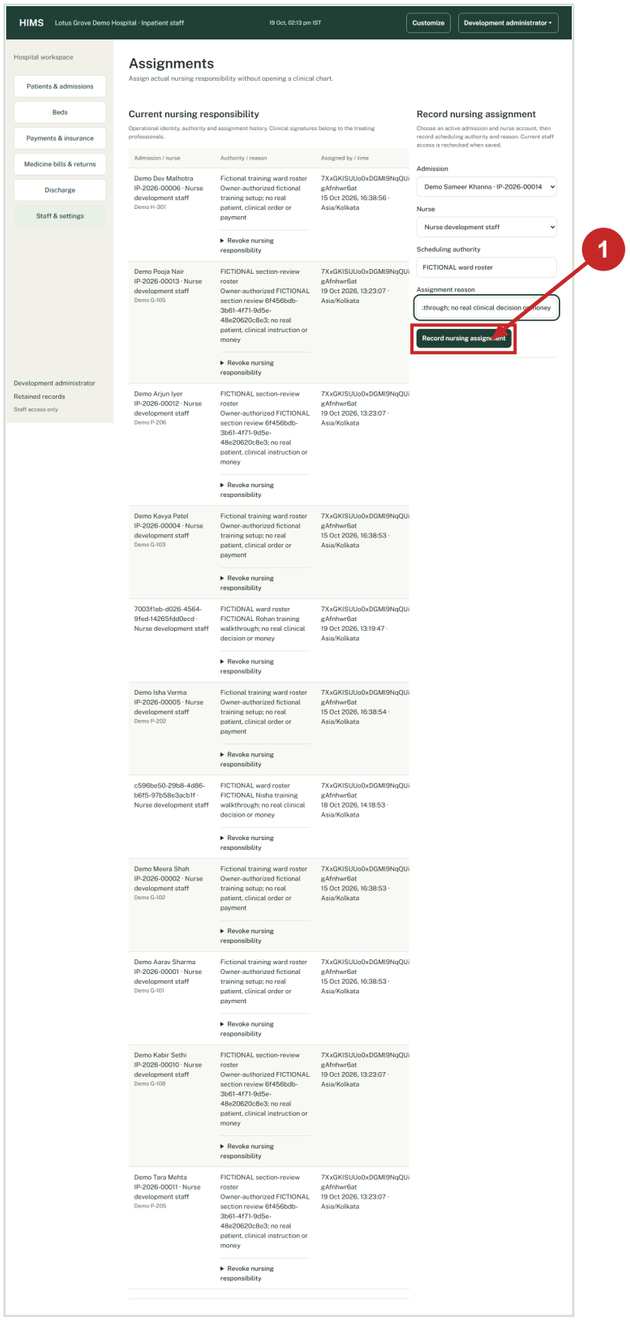

Result: Sameer is ADMITTED in G-104. Actual room charging starts from the arrival time. The deposit is recorded once.

ADMISSION - full portal page

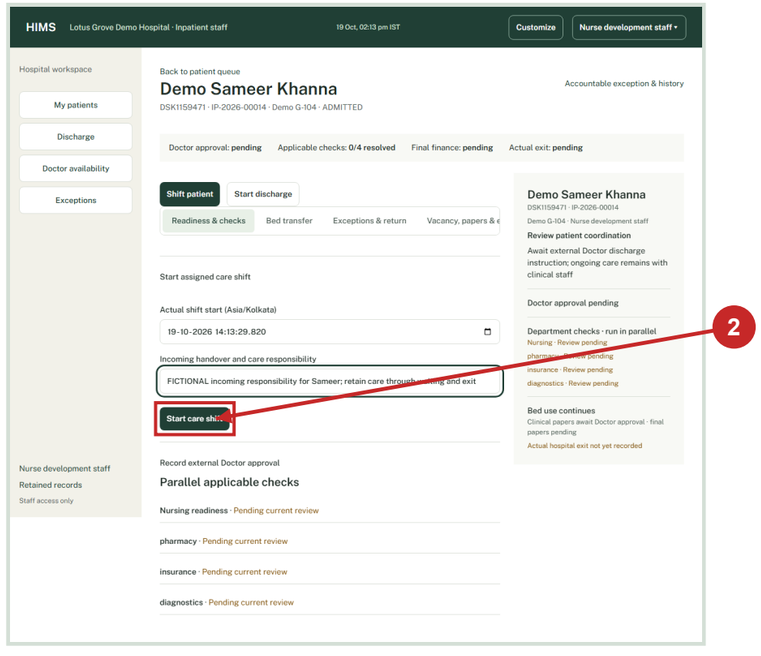

ADMISSION - full portal page

03 Admin and Nurse - assign responsibility

Admin > Staff & settings > Patient nursing assignments; Nurse > Sameer > Readiness & checks

ADMIN - full portal page

NURSE - full portal page

1. Record nursing assignment

Admin selects Sameer and the responsible Nurse, enters scheduling authority and reason, then clicks **Record nursing assignment**.

Record nursing assignment

2. Start care shift

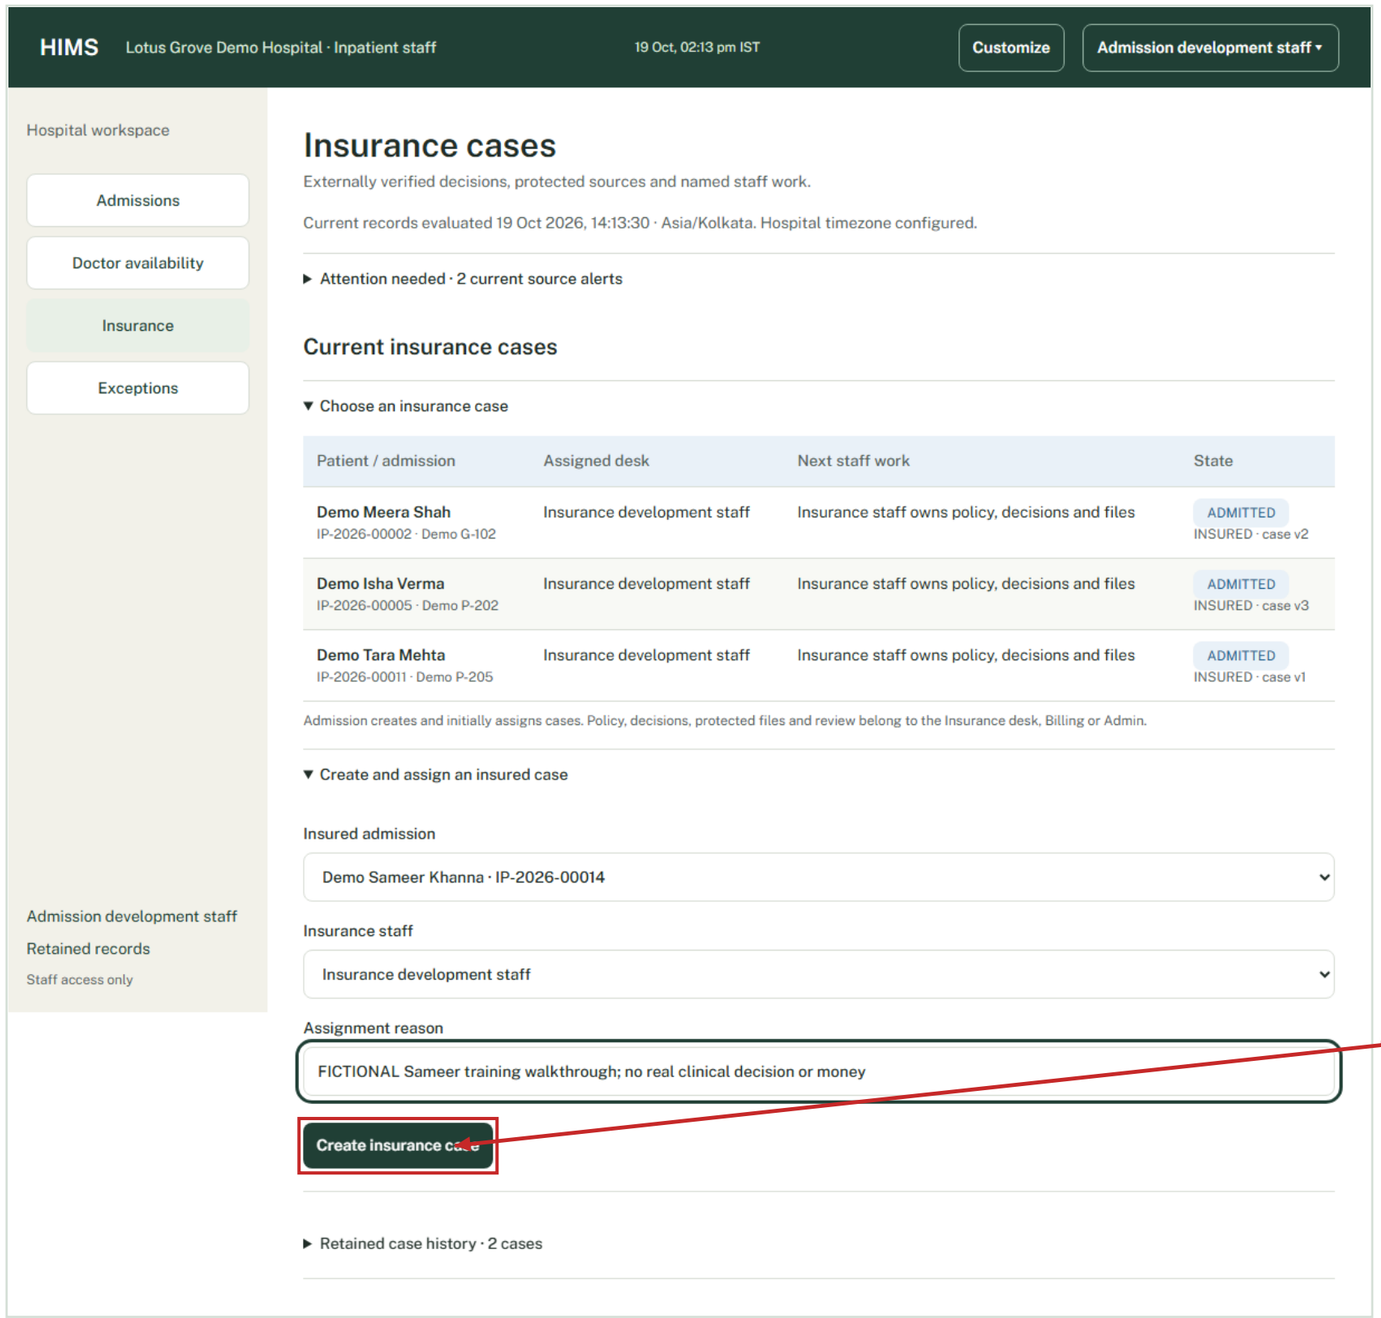

The assigned Nurse opens **Start assigned care shift**, enters actual shift start and incoming handover, then clicks **Start care shift**.

Start care shift

Result: Assignment controls who may work on this patient. The care shift separately records actual attendance and responsibility.

04 Admission - hand off the insured case

Admission > Insurance > Create and assign an insured case

ADMISSION - full portal page

1. Create insurance case

Choose Sameer's admission and the responsible Insurance staff. Enter the assignment reason and click **Create insurance case**. The assigned Insurance user then opens Sameer from **Cases**.

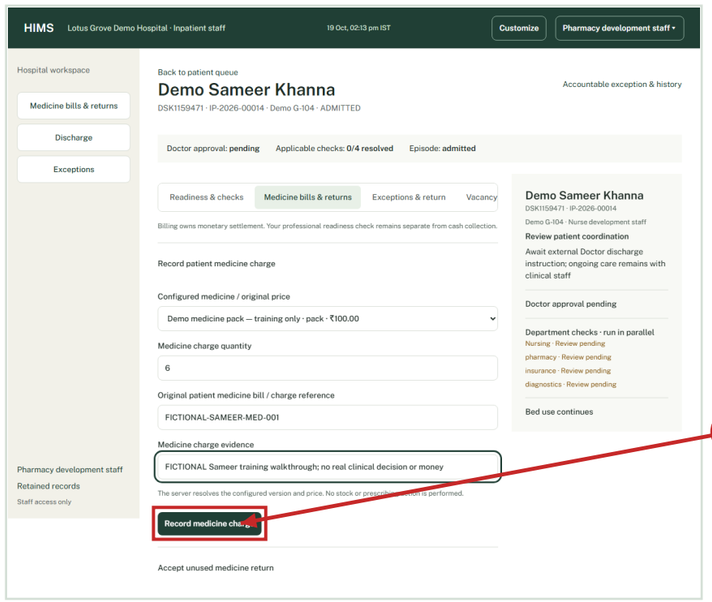

Create insurance case

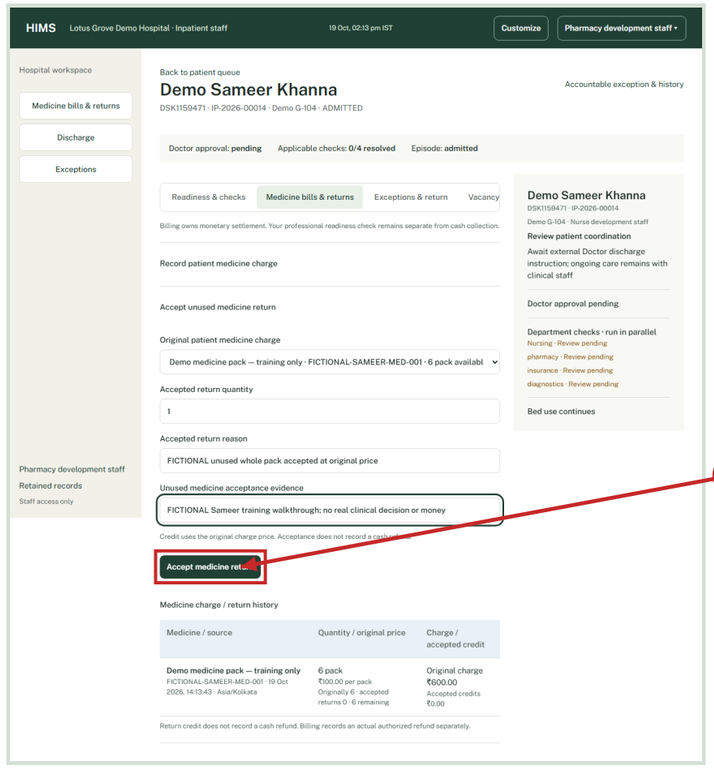

Result: One insurance case is linked to this admission. Creating it does not verify coverage or record insurer money.

Policy verification can start early while care continues. In this walkthrough the final payer allocation is recorded after physical vacancy fixes the room bill.

05 Pharmacy - charge medicine and accept a return

Pharmacy > Medicine bills & returns > Sameer > Medicine bills & returns

1. Record medicine charge

Expand **Record patient medicine charge**. Select the configured ₹100 medicine pack, quantity 6, original bill reference and evidence. Click **Record medicine charge**.

2. Accept medicine return

Expand **Accept unused medicine return**. Select the original charge, quantity 1, acceptance reason/evidence, then click **Accept medicine return**.

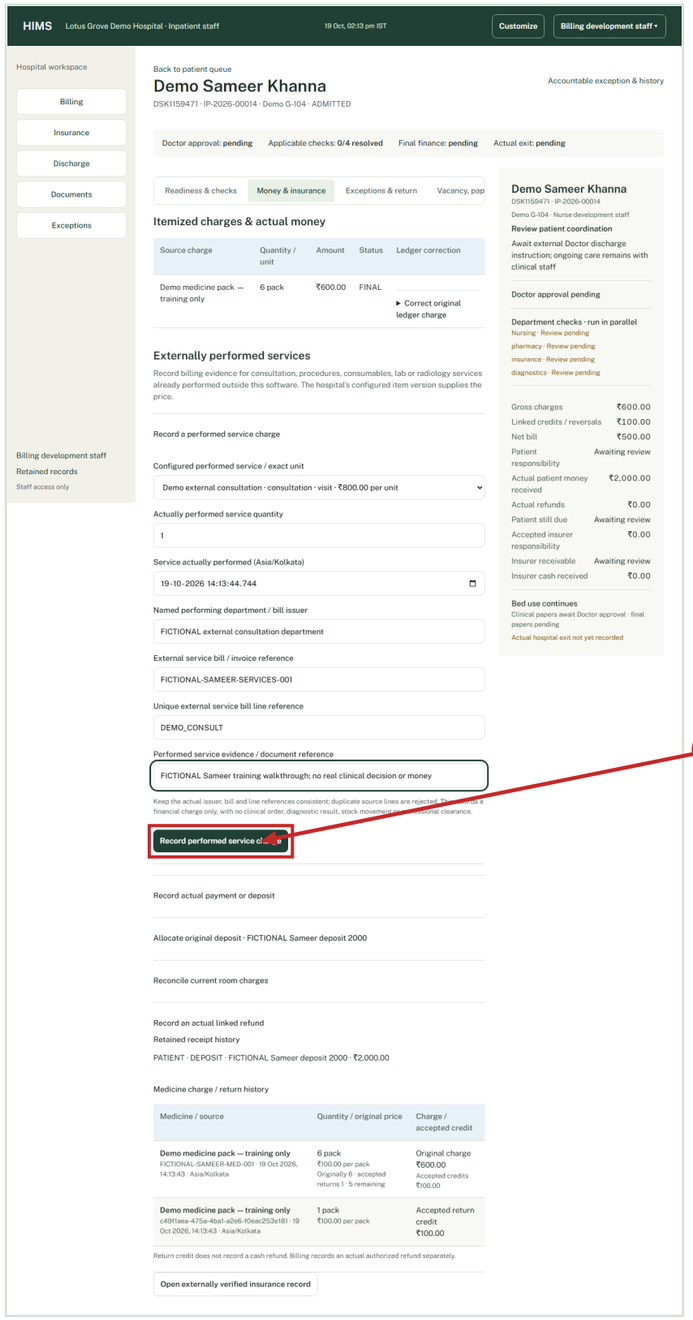

Result: Medicine: ₹600 charged − ₹100 accepted return = ₹500 net. This return is a bill credit; Billing records any actual cash refund.

PHARMACY - full portal page

PHARMACY - full portal page

06 Billing - record performed services

Billing > Sameer > Money & insurance > Record a performed service charge

BILLING - full portal page

1. Record performed service charge

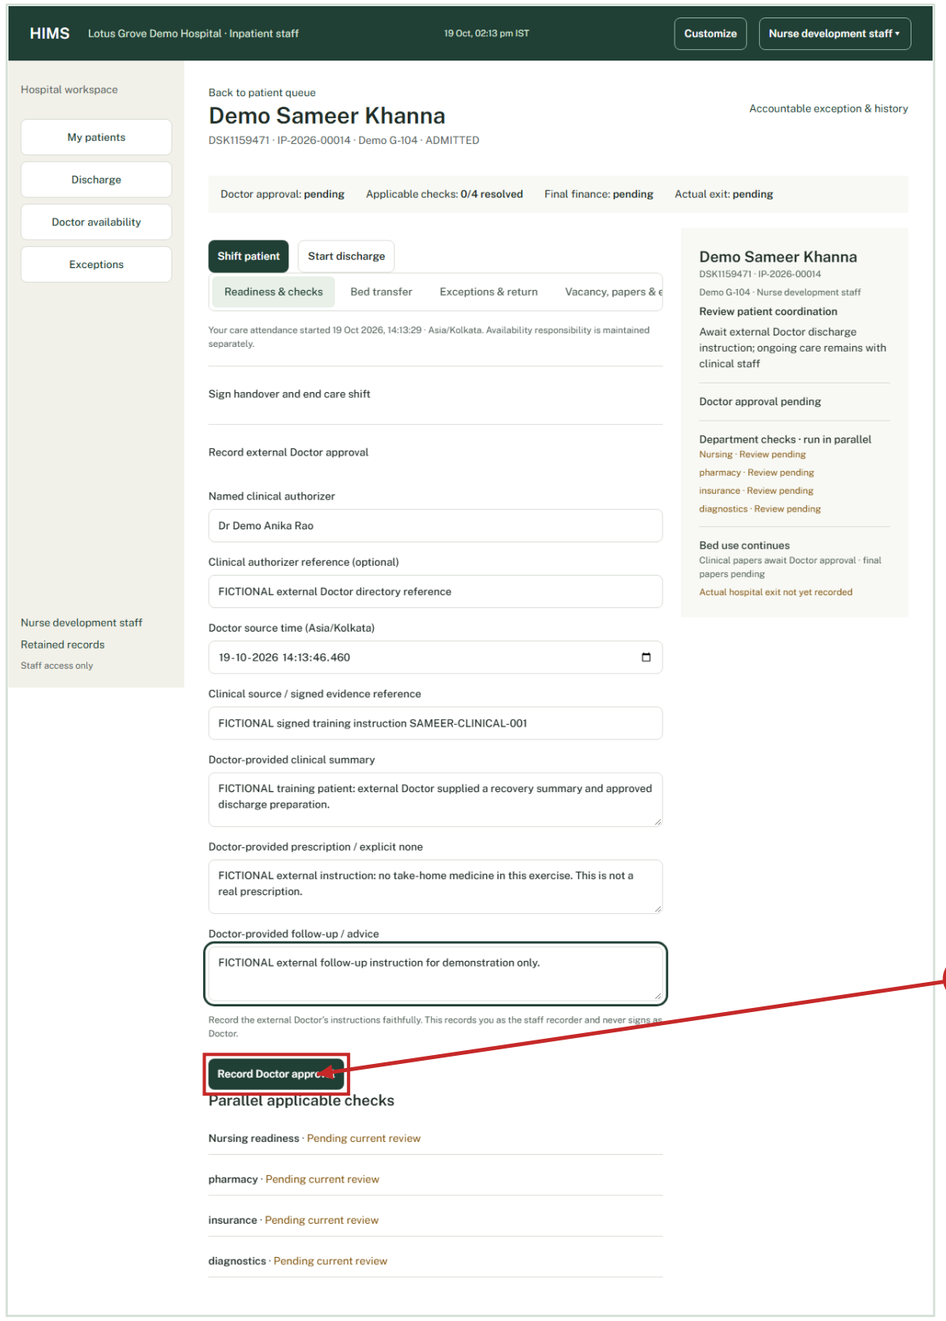

Select external consultation, quantity 1; enter performed time, issuer, bill reference, unique line reference and evidence. Click **Record performed service charge**. Repeat for the blood count with its own line reference.

Record performed service charge

Result: Consultation adds ₹800; blood count adds ₹400. The configured prices are used. These entries record performed work; they do not create clinical orders.

07 Nurse - record the Doctor’s instruction

Nurse > Sameer > Readiness & checks > Record external Doctor approval

NURSE - full portal page

1. Record Doctor approval

Enter the named external Doctor, source time and signed-evidence reference. Copy the Doctor-provided clinical summary, prescription or explicit none, and follow-up. Click **Record Doctor approval**.

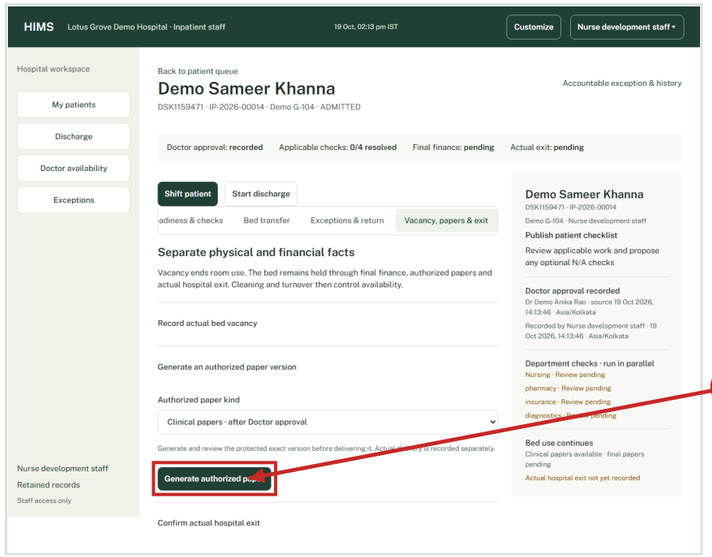

Record Doctor approval

Result: Doctor authority and the Nurse recorder/time are kept separately. Discharge preparation can now proceed.

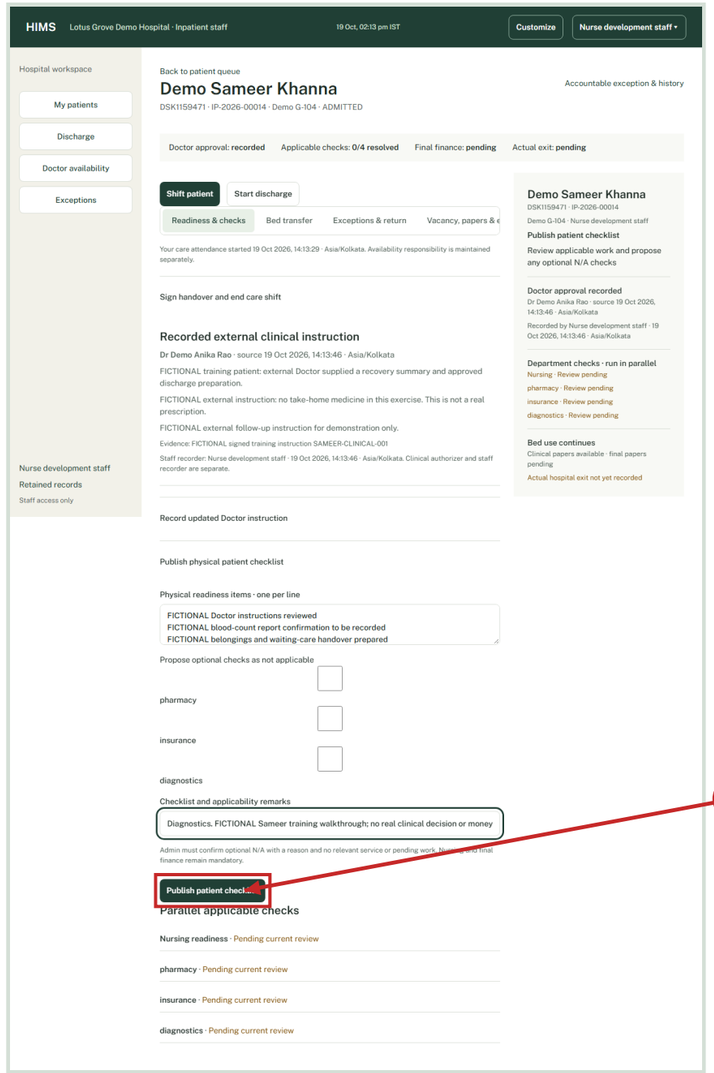

There is no routine Doctor dashboard. The Doctor decides externally; the assigned Nurse records that instruction faithfully.

08 Nurse - prepare clinical papers and the checklist

Nurse > Sameer > Vacancy, papers & exit; then Readiness & checks

NURSE - full portal page

NURSE - full portal page

1. Generate authorized paper

Open **Generate an authorized paper version**; select **Clinical papers · after Doctor approval** and click **Generate authorized paper**. Open and review the saved clinical version.

Generate authorized paper

2. Publish patient checklist

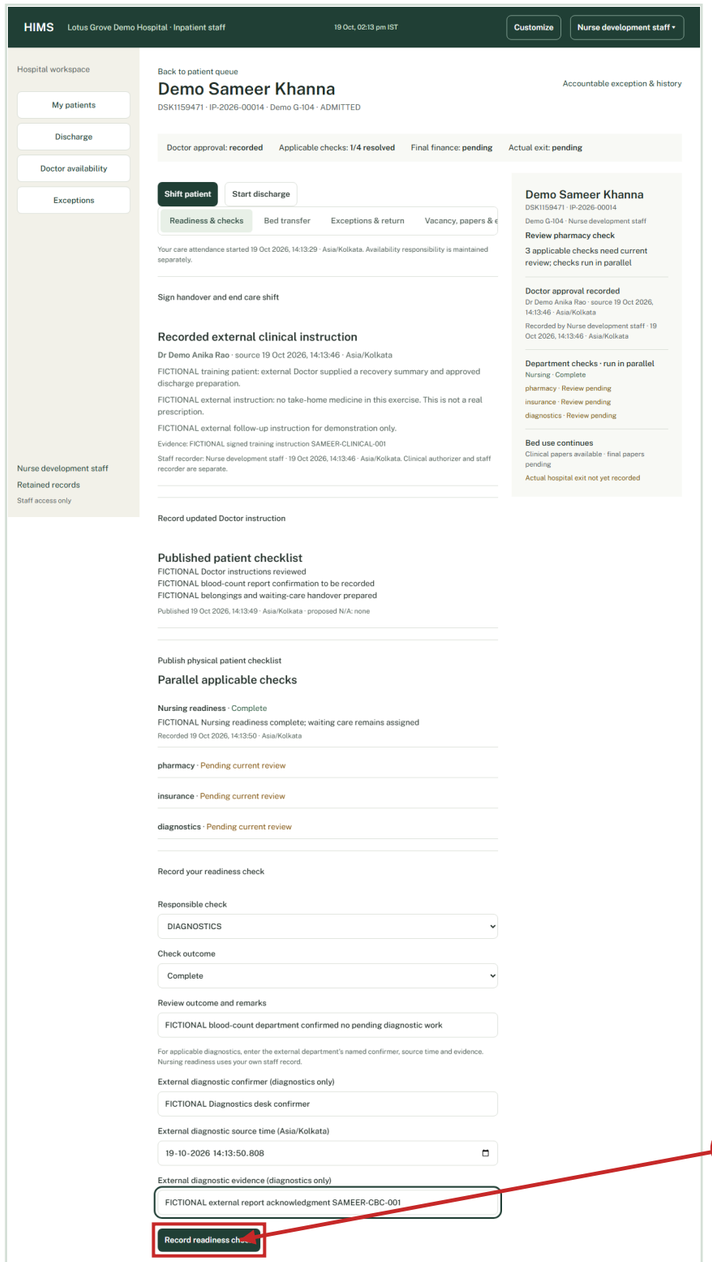

In **Readiness & checks**, expand **Publish physical patient checklist**. Enter physical readiness items and remarks, then click **Publish patient checklist**.

Publish patient checklist

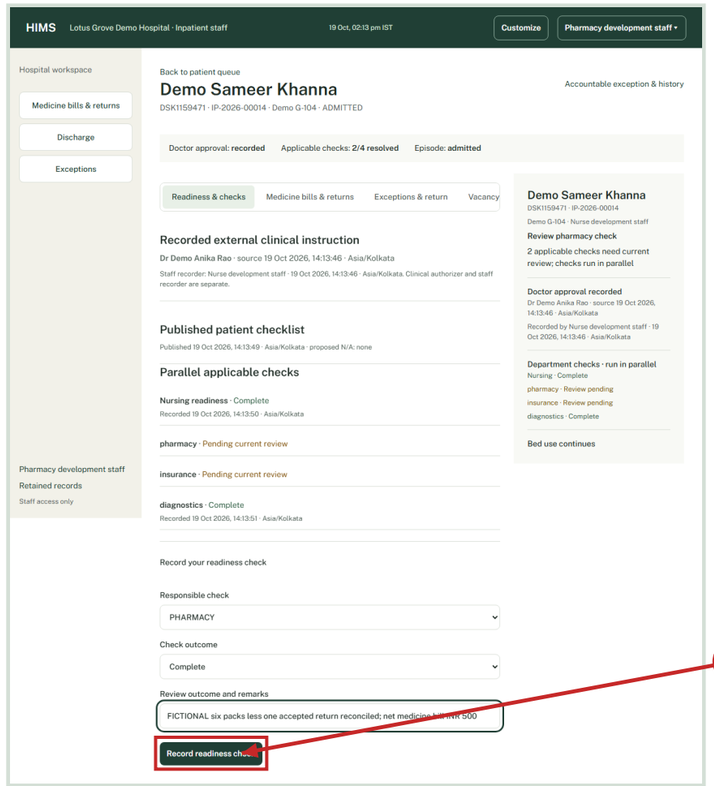

Result: All four checks apply to Sameer: Nursing, Diagnostics, Pharmacy and Insurance. They can proceed in parallel. Clinical papers do not require final finance.

09 Nurse and Pharmacy - complete their own checks

Nurse / Pharmacy > Sameer > Readiness & checks > Record your readiness check

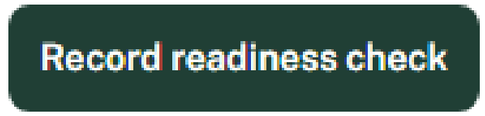

NURSE - full portal page

PHARMACY - full portal page

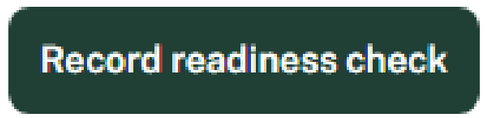

1. Record readiness check

Nurse first chooses **NURSING**, Complete and remarks, then **Record readiness check**. Repeat for **DIAGNOSTICS**, adding the external confirmer, source time and evidence shown here.

2. Record readiness check

Pharmacy chooses **PHARMACY**, Complete and reconciliation remarks, then clicks **Record readiness check**. The six packs and one accepted return must agree.

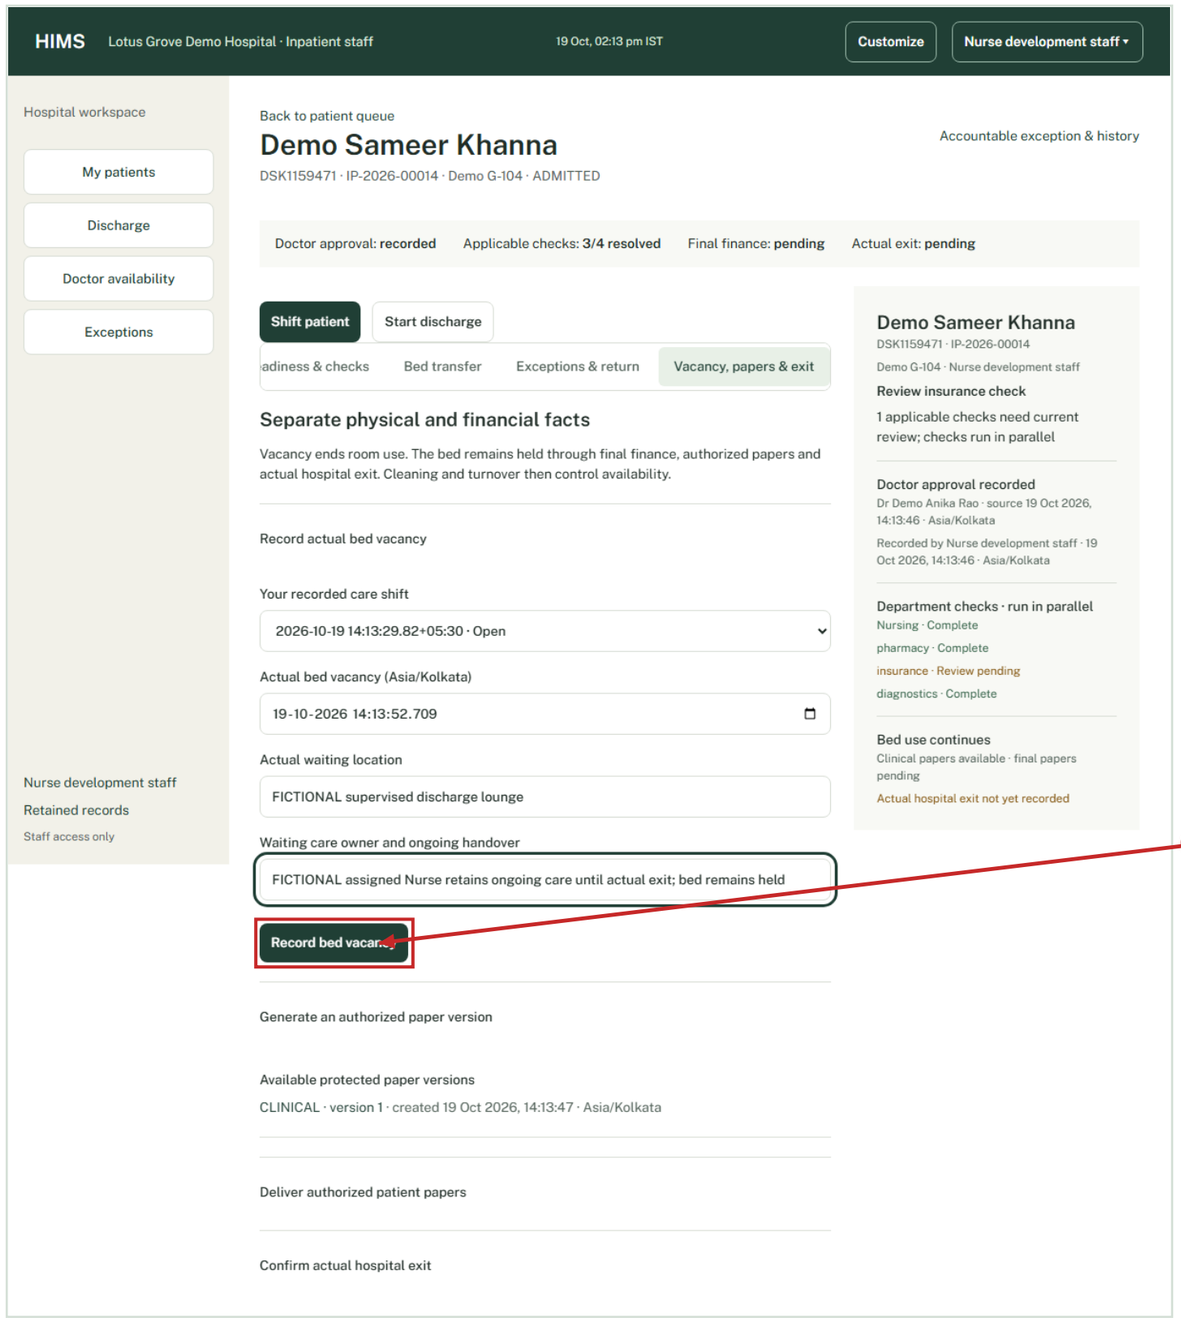

Result: Each desk records its own check. Diagnostics is externally confirmed and recorded by Nurse; it is not an additional dashboard.

Insurance completes its own check after verified responsibility is current. A material source change may require affected checks again.

10 Nurse - record vacancy and waiting care

Nurse > Sameer > Vacancy, papers & exit > Record actual bed vacancy

NURSE - full portal page

1. Record bed vacancy

Choose the recorded care shift. Enter actual bed-vacancy time, the supervised waiting location and who retains care. Click **Record bed vacancy**.

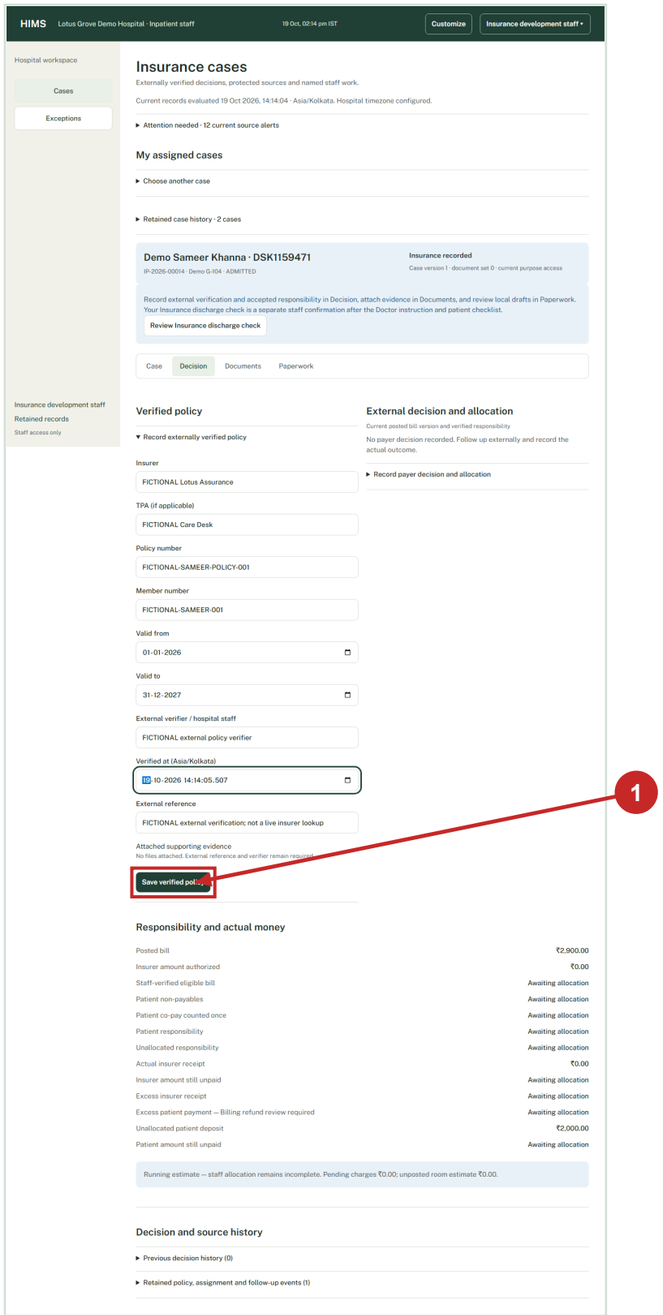

Result: Room use ends and the ₹1,200 room charge is finalized. Sameer waits under care. The bed remains held until actual exit and cleaning.

Vacancy is not hospital exit. The final net bill is ₹1,200 room + ₹800 consultation + ₹400 blood count + ₹600 medicine − ₹100 return = ₹2,900.

11 Insurance - save externally verified policy

Insurance > Cases > Sameer > Decision > Record externally verified policy

INSURANCE - full portal page

1. Save verified policy

Enter insurer/TPA, policy/member numbers and validity dates. Record the external verifier, verification time, reference and relevant evidence, then click **Save verified policy**.

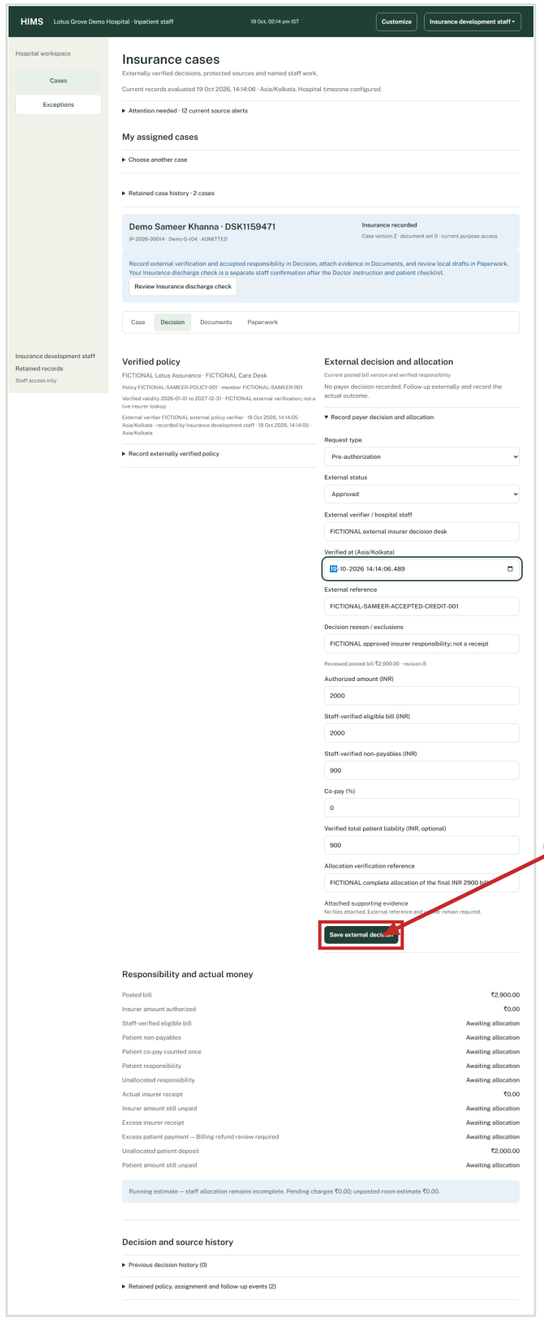

Save verified policy

Result: Staff-verified policy information is retained against Sameer’s case. It is separate from a payer decision or an actual receipt.

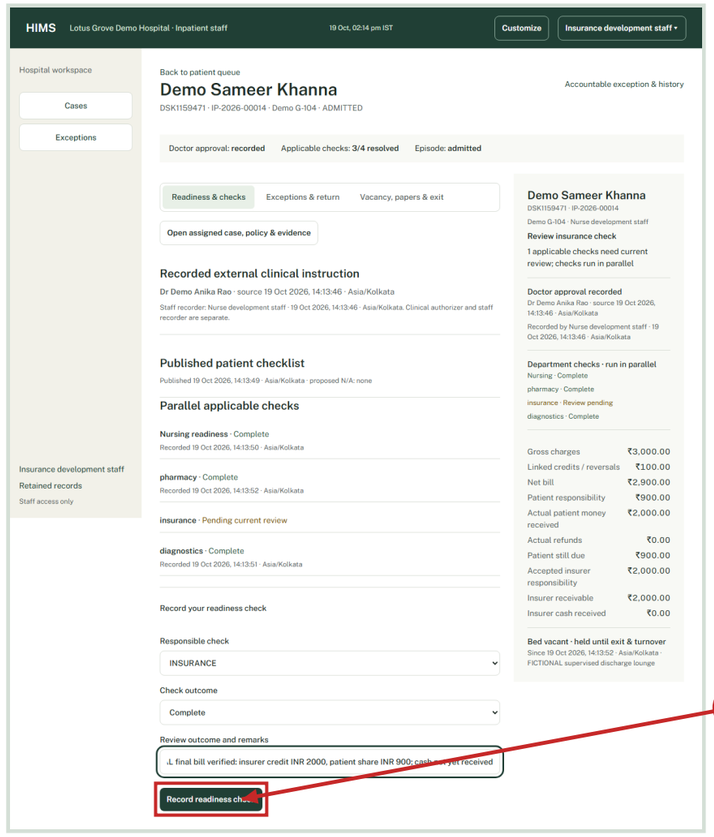

This can be done earlier in the stay. The app records external verification; it does not look up or approve insurance by itself.

12 Insurance - allocate responsibility and clear its check

Insurance > Sameer > Decision; then Review Insurance discharge check

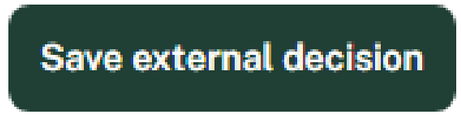

INSURANCE - full portal page

INSURANCE - full portal page

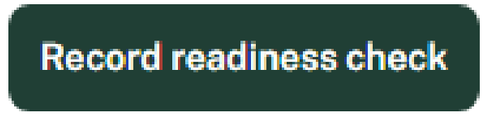

1. Save external decision

Record the external payer outcome and provenance. For the ₹2,900 bill, enter authorized/eligible ₹2,000, non-payables ₹900, co-pay 0 and patient liability ₹900. Click **Save external decision**.

2. Record readiness check

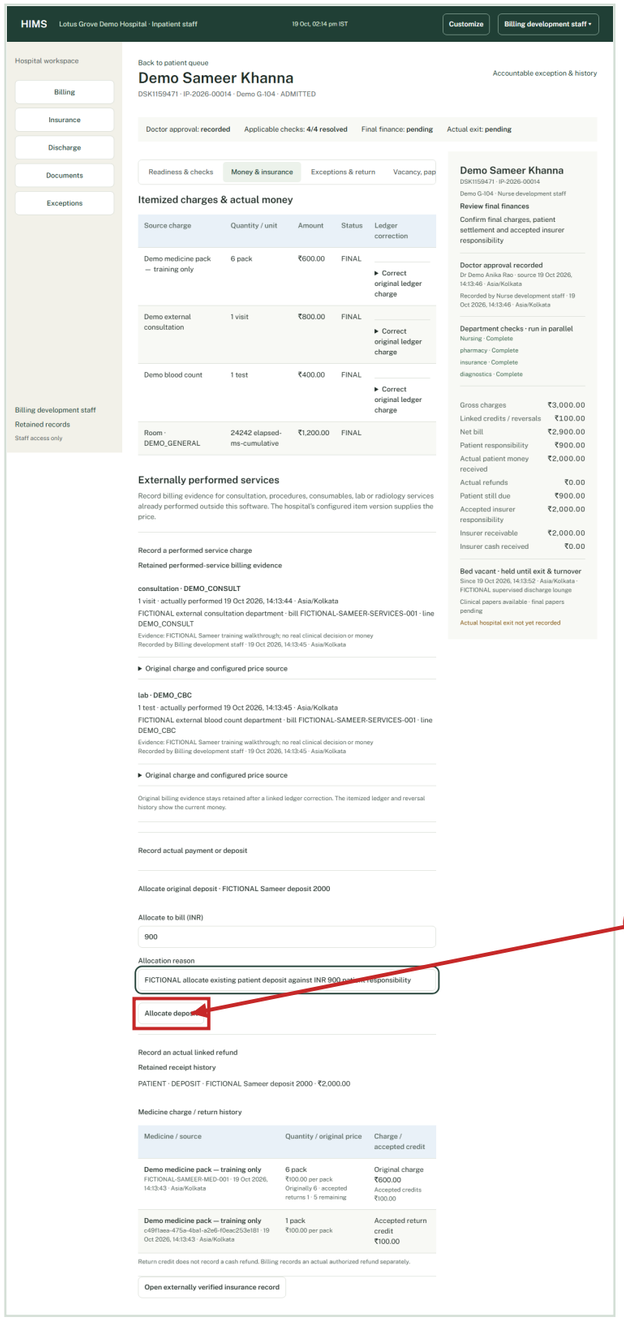

Open **Review Insurance discharge check**, then **Record your readiness check**. Choose INSURANCE, Complete and remarks; click **Record readiness check**.

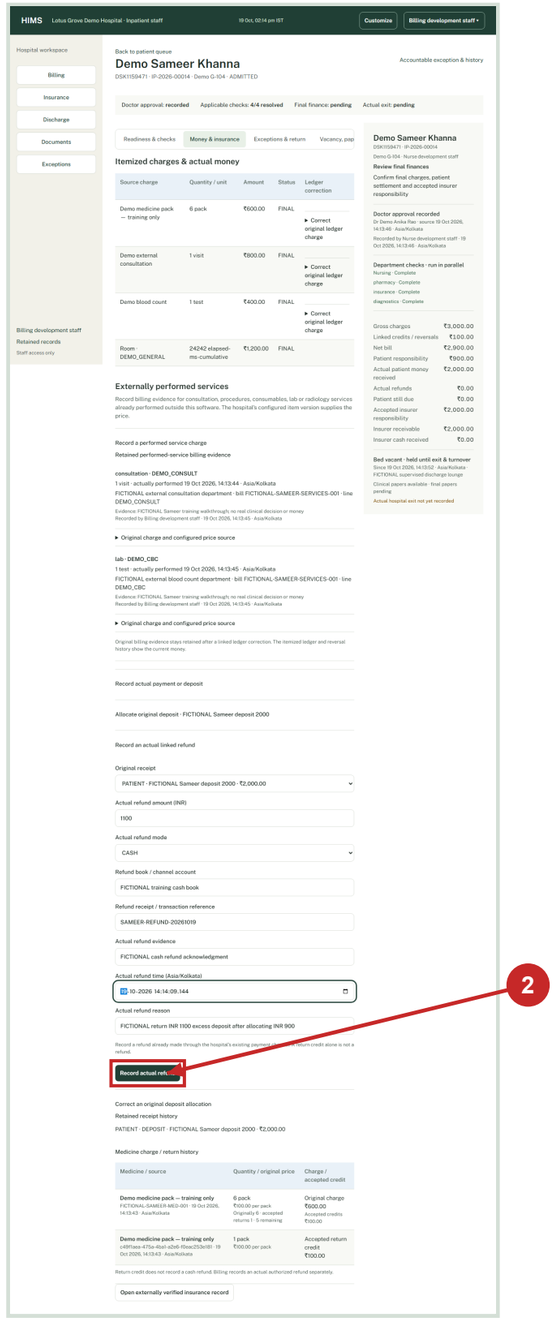

Result: Patient responsibility is ₹900. Accepted insurer responsibility is ₹2,000, still receivable until actual money arrives.

13 Billing - allocate the deposit and refund the excess

Billing > Sameer > Money & insurance

BILLING - full portal page

BILLING - full portal page

1. Allocate deposit

Expand **Allocate original deposit · FICTIONAL Sameer deposit 2000**. Enter ₹900 and the reason, then click **Allocate deposit**.

2. Record actual refund

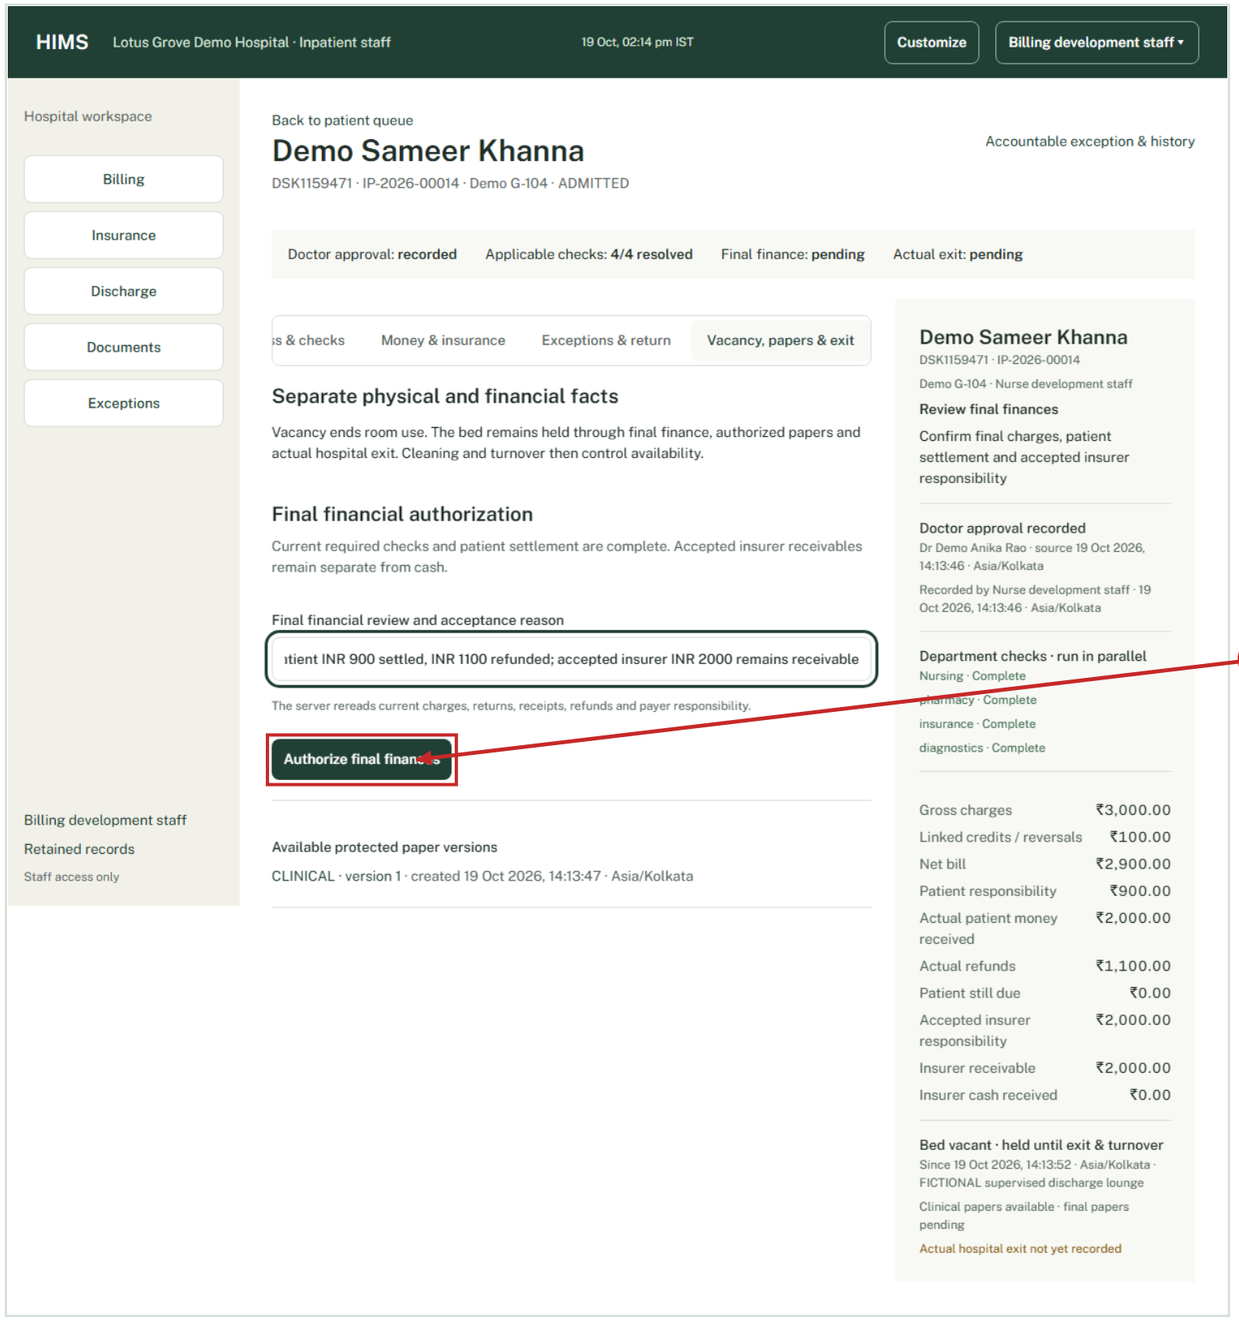

Refund the ₹1,100 excess through the hospital channel. Open **Record an actual linked refund**, select the original receipt, enter actual amount/mode/reference/evidence/time/reason, then **Record actual refund**.

Result: The ₹900 patient share is settled and ₹1,100 excess is refunded. Use the original deposit; do not record it again.

14 Billing or Admin - authorize final finance

Billing / Admin > Sameer > Vacancy, papers & exit > Final financial authorization

BILLING - full portal page

1. Authorize final finances

Review the final bill, checks, deposit allocation, actual refund and accepted insurer responsibility. Resolve every blocker. Enter the final review/acceptance reason and click **Authorize final finances**.

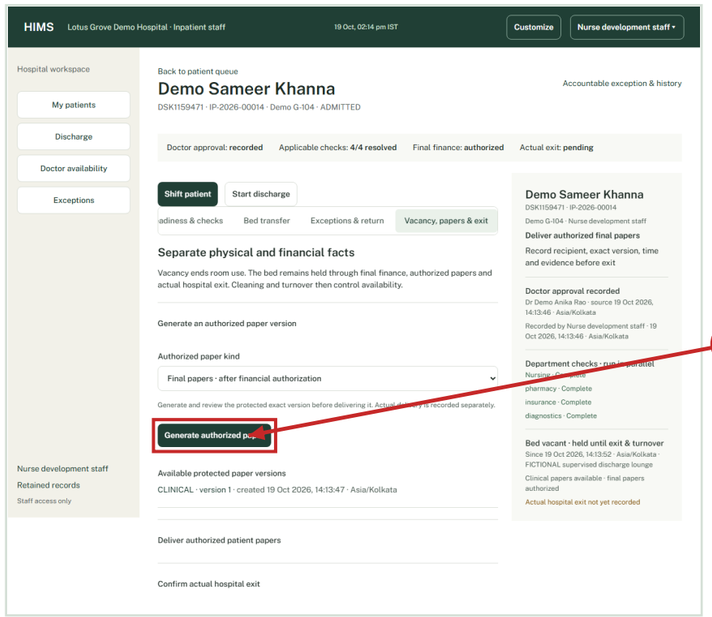

Authorize final finances

Result: Final finance is authorized with the patient settled and the ₹2,000 accepted insurer receivable retained.

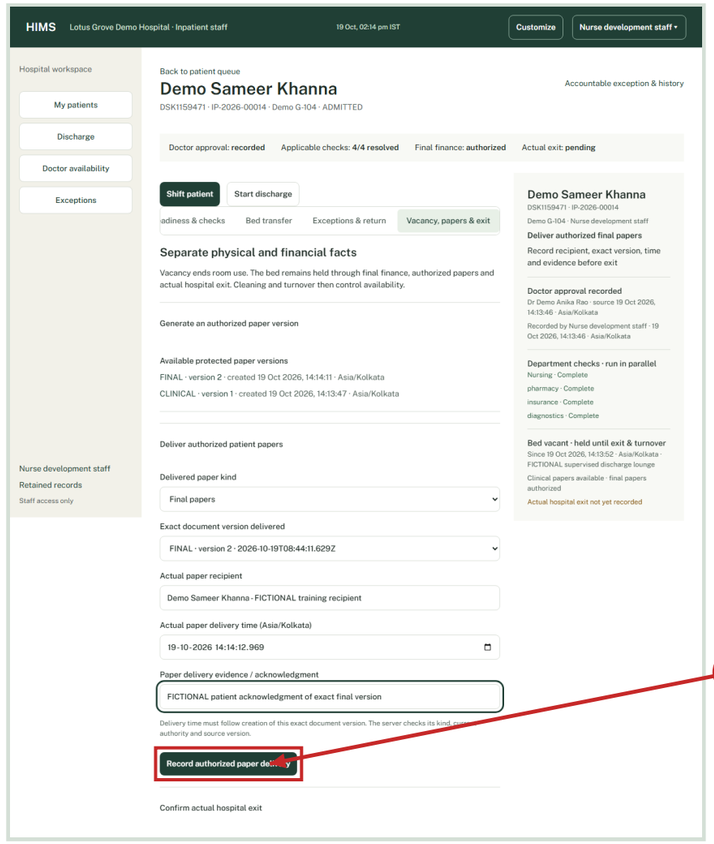

An insurer receipt is not required at ordinary exit when accepted responsibility, patient settlement and all required checks satisfy the rules.

15 Nurse - generate and deliver the exact final papers

Nurse > Sameer > Vacancy, papers & exit

NURSE - full portal page

NURSE - full portal page

1. Generate authorized paper

Select **Final papers · after financial authorization**, then **Generate authorized paper**. Open the saved FINAL version and review it before delivery.

Generate authorized paper

2. Record authorized paper delivery

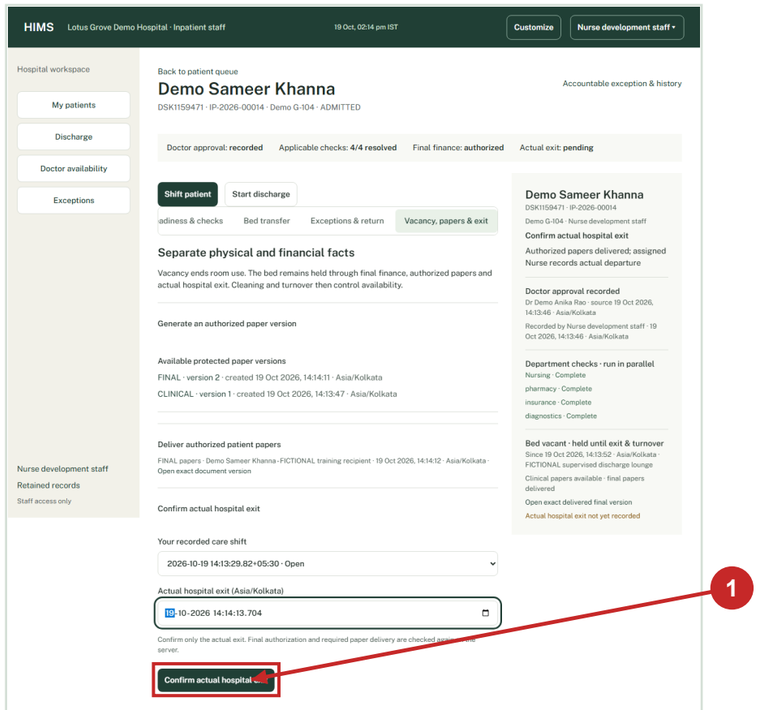

Expand **Deliver authorized patient papers**. Choose Final papers and the exact document version; enter recipient, delivery time and acknowledgment. Click **Record authorized paper delivery**.

Record authorized paper delivery

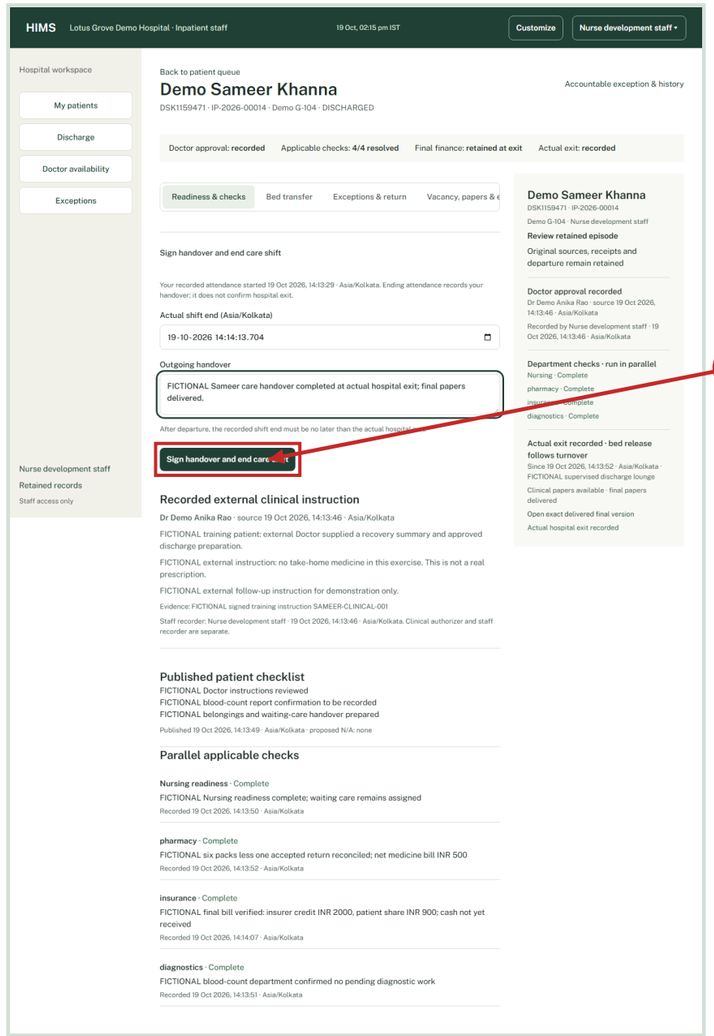

Result: The exact authorized final version is delivered. Generating a PDF and recording actual delivery are separate actions.

16 Nurse - record actual exit and close care attendance

Nurse > Sameer > Vacancy, papers & exit; then Readiness & checks

NURSE - full portal page

NURSE - full portal page

1. Confirm actual hospital exit

Once Sameer actually leaves, choose the care shift, enter actual exit time and click **Confirm actual hospital exit**. Required authorizations and delivery are checked again.

2. Sign handover and end care shift

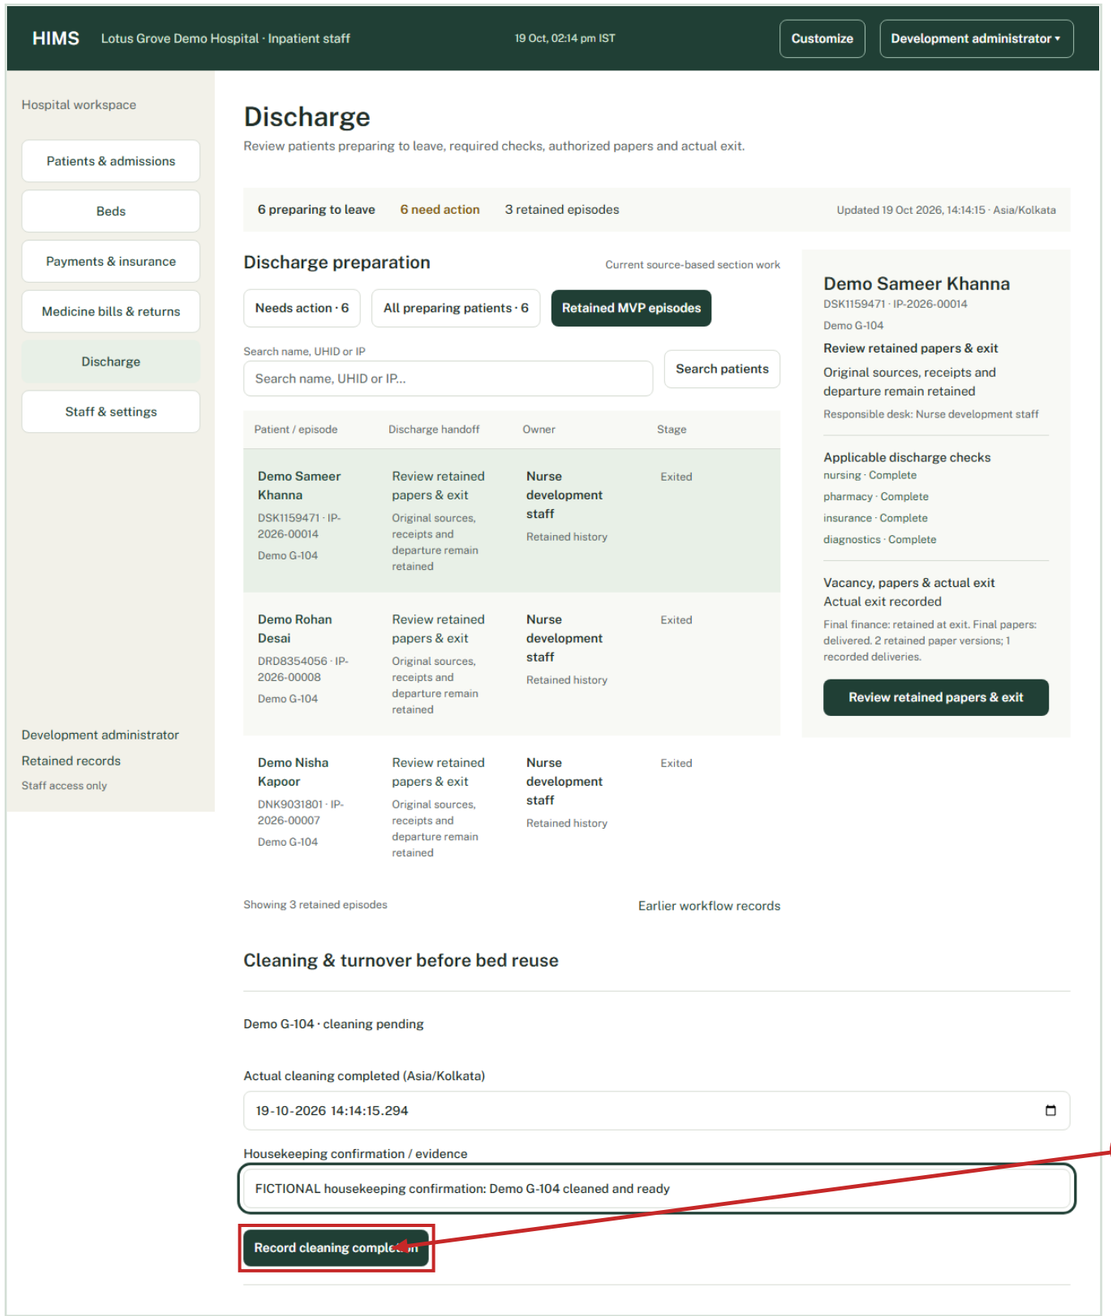

In **Readiness & checks**, open **Sign handover and end care shift**. Enter actual shift end and outgoing handover, then click the same-named button. In this example the recorded shift end equals actual exit.

Result: Sameer is DISCHARGED. Attendance handover and physical exit are retained as separate facts; a post-exit shift end cannot be later than actual exit.

17 Admin - confirm cleaning and release the bed

Admin > Discharge > Retained MVP episodes > Cleaning & turnover before bed reuse

ADMIN - full portal page

1. Record cleaning completion

Open **Demo G-104 · cleaning pending**. Enter actual cleaning completion and housekeeping confirmation/evidence, then click **Record cleaning completion**. Review G-104 in **Beds**.

Record cleaning completion

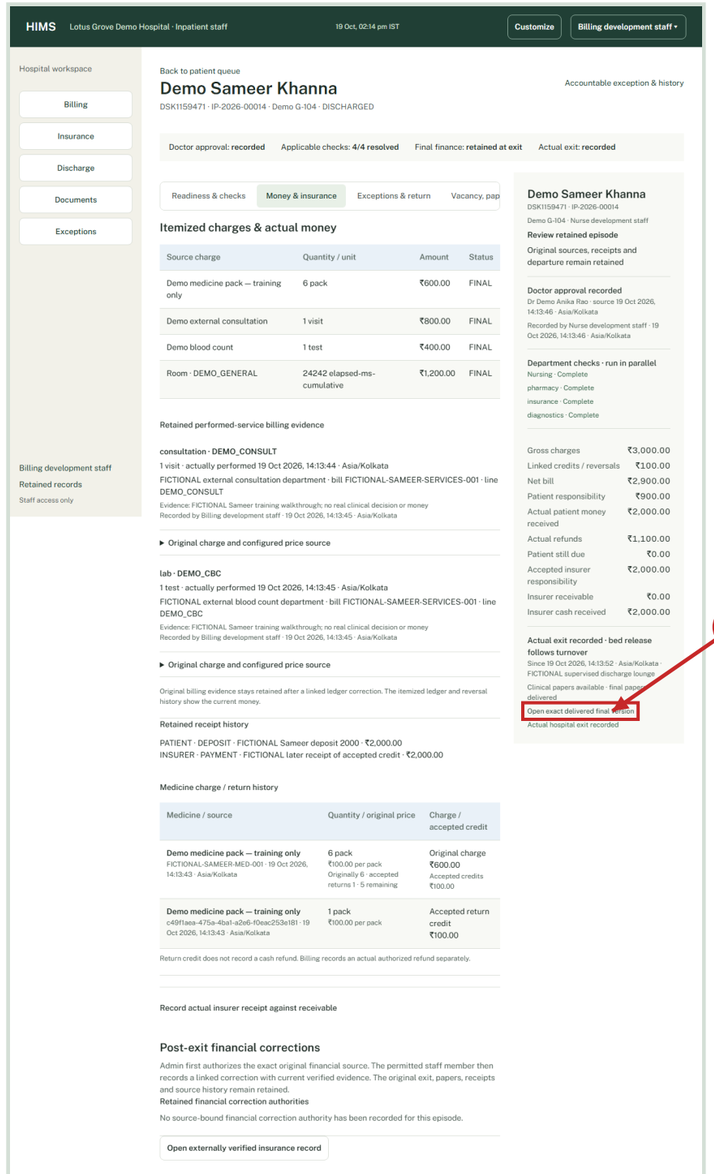

Result: G-104 is Ready for another admission. Vacancy ended room use; actual exit closed departure; authorized cleaning/turnover released the bed.

18 Billing - settle the later insurer payment

Billing > Retained MVP episodes > Sameer > Money & insurance

BILLING - full portal page

BILLING - full portal page

1. Record insurer receivable receipt

When insurer money actually arrives, open **Record actual insurer receipt against receivable**. Enter ₹2,000, BANK, channel, receipt/reference and evidence; click **Record insurer receivable receipt**.

Record insurer receivable receipt

2. Open exact delivered final version

Review the retained balances and recorded actual exit. **Open exact delivered final version** retrieves the original paper. Later payment does not recreate or rewrite the discharge.

Open exact delivered final version

Result: Completed: net bill ₹2,900; patient retained ₹900; refunded ₹1,100; insurer cash ₹2,000; remaining receivable ₹0. The original final PDF stayed unchanged.

Use Retained MVP episodes / Retained MVP cases for this current workflow. The sidebar's Retained records opens the earlier workflow. Screens captured from the local portal on 19 October 2026.
